FOR IMMEDIATE RELEASE

CREATE A FAMILY HEIRLOOM
Fabric Growth Charts Form a Permanent Record of Child's Height

Photographer Donna Brunet's growth charts incorporate her photographs of Missouri butterflies and dragonflies. The intriguing graphic design utilizes a centered but alternating ruler which extends from 6" to 6'6", allowing you to keep a permanent record of your child's or grandchild's height at pivotal moments from birth through high school.

The charts are individually printed using archival inks on fabric backed with a removable and re-useable adhesive. Your child won't outgrow these wildlife photographs; they are also attractive for decorating grandparents' homes.

You can view these great gifts for family, friends, or yourself at Brunet's gallery in Orr Street Studios in downtown Columbia. Or take a look online at <http://donnabrunet.com/pages/prints.html#growth>
